Paste in URL here

Add

These are all links that will open a new tab at the URL that has been provided when adding an item.

My List:

X	Sample Item Description	Purchased	
X	Sample Item Description	Purchased	
X	Sample Item Description	Purchased	
X	Sample Item Description	Purchased	
X	Sample Item Description	Purchased	
X	Sample Item Description	Purchased	
X	Sample Item Description	Purchased	
X	Sample Item Description	Purchased	
X	Sample Item Description	Purchased	
X	Sample Item Description	Purchased	
X	Sample Item Description	Purchased	
X	Sample Item Description	Purchased	

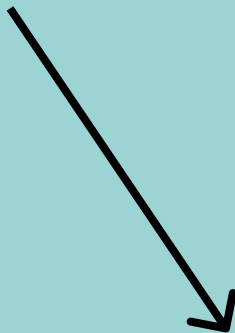

This is pie in the sky. I'm hoping to be able to load an image preview from the URL like what happens when you text a URL to someone. This would happen on a single click or item in the list, and on double click would open a new tab with URL loaded. If I can't make this happen. I will probably center the My List.

Table containing the list of items to purchase with a value to identify already purchased

current_list			
List of items that are "to be" purchased.			
	list_id	serial	
	description	varchar(255)	
	url	varchar(255)	
	is_purchased	boolean	

recent_delete			
table of items that have been recently deleted			
	id	int	
	description	varchar(255)	
	url	varchar(255)	
	is_purchased	boolean	

Table containing recently deleted items as a fallback between initial deletion and permanent deletion
